ZeroNines® Technology, Inc. partners with Aubice, Inc. to develop Secure, Highly Available Compliance product

Castle Rock, CO, September 20, 2006 - ZeroNines Technology, Inc, a provider of information security and high availability solutions, announced today it has reached a definitive agreement with Aubice, Inc., a Colorado based company to co-develop a secure, high-available compliance product.

Alan Gin, CEO of ZeroNines commented, “Our relationship with Aubice has truly been a collaborative technical effort providing the first secure and always available compliance product of its kind. Our technology clearly demonstrates to security and business continuity managers the strength of our journaling capability. It captures all financial and business critical information while synchronizing it to multiple secure, remote locations at greater distances than is currently available. We call this MultiSynchronization™. Aubice provides a unique capability to search unstructured data elements across an enterprise and create actionable information. We’ve partnered to use our unique capabilities to deliver a very clever compliance offering.”

Dr. Michael G. Zentner, Aubice’s CEO, commented, “Our technology platform in the search and connect domains blends perfectly with the secure transactional

technology of ZeroNines. This results in a unique combination of competencies that differentiates the joint offering from any other product currently available.”

Gin added, “The ZeroNines FailSafe architecture provides seamless application availability, displacing the need for reactive fail-over and recovery solutions. We are able to provide the highest level of availability without modification to existing customer applications. Working with the Aubice team to create a read-only template for Sarbanes-Oxley and HIPPA compliance ad-hoc reporting proved to be a valuable tool for every enterprise with which we’ve spoken.”

About ZeroNines®

ZeroNines was founded in 2000 to develop and deploy proprietary MultiSynchronization information security and availability solutions to empower customers with a new business continuity standard: true 24 x 7 access to valued applications and content. ZeroNines’ technology leverages and maximizes customers’ current processing and storage infrastructure by operating agnostically across multiple platforms, thereby shifting the paradigm from reactive disaster recovery to proactive business continuity.

ZeroNines® is a USA-based company with headquarters in Denver, Colorado. The primary target customer base includes Global 2000 companies. It offers enterprise infrastructure assessment, program and project management implementations.

“Securing A World without Downtime™” is the company’s vision. ZeroNines® solutions will enable business continuity to the masses in an affordable manner allowing our clients to determine the level of availability they require thus ensuring access to critical data without making changes to their existing infrastructure.
