ZERONINES® TECHNOLOGY, INC. ANNOUNCES BILL KRAMER TO TECHNICAL ADVISORY BOARD

***Cingular Wireless and Telecom Veteran
Named to Company's Technical Advisory Board***

Castle Rock, CO, October 5, 2006 - ZeroNines Technology, Inc., a provider of information security and high availability solutions, announced today that Bill Kramer, Vice President of Technology Solutions, Cingular Wireless, has joined the ZeroNines Technical Advisory Board.

Jake Smith, Chairman of ZTI's Technical Advisory Board and Outside Director, commented, "Bill has a proven track record of delivering innovative technology solutions in the industry. His expertise in wireless security and authentication technologies will be a valuable asset to the ZTI TAB. As a 20+ year telecom executive, Bill has a unique understanding of the importance of business continuity and high-availability solutions. His insights and vision will be an invaluable asset to the ZTI Technical Advisory Board as we move into our next phase of organizational growth."

Bill Kramer commented, "ZTI's solution and the technical advisory board is a unique opportunity to explore new ideas, technologies and potential services in the area of business continuity and security. I look forward to the opportunity to work with the ZTI TAB and management team."

"Bill is a welcome addition to the Technical Advisory Board," added Chief Executive Officer, Alan Gin. "His unique understanding of the complexities of the wireless industry, the scalability of business continuity and security solutions adds a level of depth to our TAB that was previously not possible."

About ZeroNines®

ZeroNines was founded in 2000 to develop and deploy proprietary MultiSynchronization information security and availability solutions to empower customers with a new business continuity standard: true 24 x 7 access to valued applications and content. ZeroNines' technology leverages and maximizes customers' current processing and storage infrastructure by operating agnostically across multiple platforms, thereby shifting the paradigm from reactive disaster recovery to proactive business continuity.

ZeroNines® is a USA-based company with headquarters in Denver, Colorado. The primary target customer base includes Global 2000 companies. It offers enterprise infrastructure assessment, program and project management implementations.

"Securing A World without Downtime™" is the company's vision. ZeroNines® solutions will enable business continuity to the masses in an affordable manner allowing our clients to determine the level of availability they require thus ensuring access to critical data without making changes to their existing infrastructure.
